README

For this assignment2, I use Java in IntelliJ IDEA to write the code, so u can just open the project in my file.

The File

In my file, which contains two sub-file, the file named "Assignment2_finaltake" is the java version for this assignment, and file named "assignmeng2_sql" is the sql version for this assignment2.

For Java version, just open the project and run
For sql version, copy and paste the code in the postgresql, and execute it
